Dear partner

We call for applicants to the "Erasmus Mundus" MSc degree in "Smart Systems Integrated Solutions", offered jointly by the consortium of Aalto University (Helsinki, Finland), University of South-Eastern Norway (Vestfold, Norway), and Budapest University of Technology and Economics (Hungary).

The MSc in Smart Systems Integrated Solutions covers microsystems and microelectronics, and how to combine these to form integrated systems. The programme is a continuation of the SSI/ SSI+ programmes, where students have graduated since 2015 with high employment success (industrial and PhD positions, in Europe and outside Europe).

The students admitted are taught their first semester in Helsinki, the second semester in Vestfold, and the third semester in Budapest. For the fourth and last semester, the students will choose one of the three institutions for their master project.

EU grants scholarships to students in Erasmus Mundus programmes, covering tuition fees and living costs. We receive applications from many excellent students, worldwide. The students eligible for applying this joint MSc are bachelors in electrical engineering, electronics, physics, materials science, mechanical engineering, biomedical engineering or a closely related discipline.

More information on the SSI website:

<http://ssi-master.eu>

and in short videos:

<https://youtu.be/l3Ztlu9VkyU>

<https://youtu.be/5ORdNqLtCAU>,

and a flyer is attached.

We would greatly appreciate if you can distribute this information among potential applicants. Thank you very much indeed!

The application deadline for the next cohort is **10 January 2024**, for those applying admission and EU scholarship. A later deadline of 15 April applies for European applicants on self-funding basis.

Best regards

**Espen Johansen**
